Math 111, Syllabus

Text: Sullivan, Trigonometry, Unit Circle Approach, plus MyLabsPlus software

Minimal learning outcomes: See https://math.byu.edu/wiki/index.php/Math_111:_Trigonometry

Class Format: All sections meet together in a Lecture Session two hours each week. Most of the time in the Lecture Session will be spent on the discussion of new material.

Homework: You can find your homework by connecting to MyLabsPlus and looking under homework. The homework problems in each homework set are due one week after the section has been covered in class. You can check your answers. If you do not get the correct answer on a problem, you may redo it. Homework will count for 20% of your grade. Your homework is submitted online, but you should work the problems out on paper and keep them in a workbook. That will be a big help for you when you study for your tests.

Getting Help: The BYU Math Lab is a great source of help. If you cannot come in, they can help you via phone (801-422-4695) or email (labhelp@mathematics.byu.edu). If you want you can email them a picture of your work and then call them to discuss it.

Attendance: Attendance in lecture is expected of all students enrolled in the class. Although the class is often large, students should participate and ask questions. The learning environment is improved when students are attentive. Students should be respectful of other students and the instructor by actively seeking to understand the material.

Exams: There will be 3 midterm exams and a final. The first exam will count 5%. The other two exams and the final will count 25% each. Practice tests are available on the Course web site - https://math.byu.edu/courses-services/math110-and-math111/. All examinations, including the final, will all given in the testing center.

Test 1 covers 1.6 and 1.7
Test 2 covers 2.1-2.6
Test 3 covers 3.1-3.7
Final Exam covers 4.1-4.5, 5.1-5.3

Grading: Your scores for homework, quizzes, tests, and the final exam will be added and averaged, and letter grades will be assigned approximately as follows:

A: 93-100%  A− : 90-92%  B+: 87-89%  B : 84-87%  B− : 80-83%
C+: 74-79%  C : 67-73%  C− : 60-66%  D+: 57-59%  D : 54-57%
D− : 50-53%

Technology: The focus in this course is on mathematics, not arithmetic. However, some
level of ability in arithmetic is necessary, both in this class and in life. You may use
calculators on homework, but not on any of the tests. The course web site describes the
level of expertise in arithmetic that is expected of Math 111 students. If you are not able
to do arithmetic at that level, you will have trouble with the exams.

You will occasionally need a calculator for your homework, but not often. You can
supply your own, find one on your computer, or check one out from the math lab.
Technology is not always helpful. You must decide whether it will help with any
particular problem.

The following statements are included at the suggestion of the University. They inform
you of expectations and of your legal rights and responsibilities relative to this class.

**Honor Code Standards**
In keeping with the principles of the BYU Honor Code, students are expected to be
honest in all of their academic work. Academic honesty means, most fundamentally, that
any work you present as your own must in fact be your own work and not that of another.
Violations of this principle may result in a failing grade in the course and additional
disciplinary action by the university.
Students are also expected to adhere to the Dress and Grooming Standards. Adherence
demonstrates respect for yourself and others and ensures an effective learning and
working environment. It is the university’s expectation, and my own expectation in class,
that each student will abide by all Honor Code standards. Please call the Honor Code
Office at 422-2847 if you have questions about those standards.

**Preventing Sexual Harassment**
Title IX of the Education Amendments of 1972 prohibits sex discrimination against any
participant in an educational program or activity that receives federal funds. The act is
intended to eliminate sex discrimination in education and pertains to admissions,
academic and athletic programs, and university-sponsored activities. Title IX also
prohibits sexual harassment of students by university employees, other students, and
visitors to campus. If you encounter sexual harassment or gender-based discrimination,
please talk to your professor; contact the Equal Employment Office at 801-422-5895 or
1-888-238-1062 (24-hours), or http://www.ethicspoint.com; or contact the Honor Code
Office at 801-422-2847.

**Students with Disabilities**
If you have a disability that may affect your performance in this course, you should get in
touch with the office of Services for Students with Disabilities (1520 WSC). This office
can evaluate your disability and assist the professor in arranging for reasonable
accommodations.
